Compact Size	X	
Good for You		
Leaves Beneficial Minerals in the Water	X	
No Taste	X	
No Slimy Feeling in the Shower	X	
Hair and Skin are Softer and Healthier	X	X

Out with the Old. In with the New!

For over 100 years conventional salt-based water softeners have stripped out healthy minerals like calcium and magnesium from water to prevent scale. While effective, salt-based water softeners have many undesirable side effects including: hauling heavy salt bags, briny taste, slimy-feeling showers, health concerns, and flushing thousands of gallons of salty waste water into our sewers and our environment.

Introducing nuvoH2O. The amazingly compact nuvoH2O system softens and conditions water without the hassle of salt. Unlike salt softeners, nuvoH2O not only prevents hard water buildup but removes existing scale as well. No brine tank, no waste water, no drain, no soft water loop, no electricity, and no slimy feeling in the shower.

Experience the benefits of naturally softened water.
